Minutes
Technology Committee
February 20, 2019

Attending: Rob Carr, Ann Christiano, Jon Morris, Houston Wells

The committee convened at 10:30.

Rob Carr reported on room 3032 technology. 4x3 screen has been replaced with a 16x9 screen to match aspect ratio of recently installed projector. Additionally, a monitor has been mounted on the north wall with a visual feed concurrent to that of the projector. (This monitor was repurposed following the transition of 2066 from meeting space to faculty offices.)

Jon Morris noted ongoing issues with teleconferencing audio and cameras in 3032. Rob will schedule a meeting with a representative from Academic Technology department to discuss upgrade options and potential work proposal. The meeting with Academic Technology will include representatives from this committee as well.

The committee discussed migrating existing audio/video tech from 3032 to G047 once 3032 is upgraded.

For future discussion: updating the "puck" input/output adapters in the AHA meeting rooms. Current configurations are functional but not optimal.

Meeting adjourned at 11:00.
